# ABSTRACT

Are you tired of studying from the same old textbooks and generic study guides? Introducing our new app, which offers a unique and personalized study experience! Our app combines the functionality of both a quiz generator and a flashcard creator, allowing you to create custom quizzes on any topic you choose. As soon as you input the topic name, the app generates quiz questions on the spot, tailored to your preferences. But that's not all! The app also creates flashcards based on the generated quiz questions, which can be imported into the popular flashcard app, Anki, for easy studying on-the-go. With our app, you can create quizzes and flashcards that are specific to your needs and learning style, making studying more efficient and effective. Say goodbye to generic study materials and hello to a personalized study experience with our app.
